RULE	WHERE	FAILURE IT PREVENTS
Tenant isolation across 4 books	before-tool check	Quoting one business stock levels from another
EPA 608 type must cover the circuit	certification gate	Promising a visit that is not legal to make
No figure without a pricing tool call	output review	An invented price reaching the caller
No success claim when every tool refused	console reply guard	Reporting a change that did not happen
Consent evaluated at dial time, customer TZ	dial-time gate	Calling after revocation, or at 3am local
Safety kinds bypass marketing consent only	queue admission	Silencing a hazard warning as if it were an ad
Console is the only writer of price and stock	agent tool lists	A caller talking the desk into a discount
Soft delete only, everywhere	every write path	Orphaning 673 work orders behind a warranty claim
The price we quoted is the price we charge	per-call register	Quoting cover at \$22.60 and invoicing \$45.00
Only what was read out can be ordered	shortlist register	"the third one" buying a chair never mentioned
This call's order outranks a remembered id	confirm gate	Confirming a desk bought on a different call
No line goes on an order unpriced	confirm gate	A sale reaching invoicing at zero
Cover joins the machine's own order	order assembly	Two invoices for one sale, one of them unpriceable
The machine must be the caller's own	ownership check	Advising on a stranger's freezer, read off a past repair
Marketing consent must be written	reply-only grant	An artificial voice calling on a spoken yes
